## “Angel Kanchev” University of Ruse

**Dear Associate Professor Desislava Atanasova, PhD!**

On behalf of the State energy institute of Turkmenistan and myself personally, please accept our sincerest congratulations on the occasion of the significant anniversary – the 80th anniversary of “Angel Kanchev” University of Ruse!

Your university is one of the leading educational and scientific centers which, for eight decades, has played a key role in the training of highly qualified specialists who have made a significant contribution to the development of science, technology, and economics of Bulgaria and other countries.

We highly value the long-standing ties that unite the State energy institute of Turkmenistan and the University of Ruse. Exchange of experience, joint research, and academic mobility programs contribute to strengthening cooperation between our countries and developing the energy sector.

On this momentous day, we wish the faculty, students, and graduates of “Angel Kanchev” University of Ruse good health, well-being, new scientific discoveries, and creative success in their noble work!

May the glorious traditions established by many generations of scientists and educators continue to inspire new generations of students to enlarge the heights of knowledge and reach new horizons!

With best wishes,

**Rektor**

**S.Nazarow**
